COMPANY HISTO

THIRD EYE has been helping companies in Security Solutions and Network Infrastructure industries-including government sectors, hospitals, educational sectors, military, airports, hotels, residential towers and oil & gas companies-to reduce operational costs, create safe work environment, create a green environment, reduce vandalism, manage staff, increase production, customer satisfaction, increase capacity, reduce unplanned downtime, and gain other tangible benefits that allow them to achieve operational excellence.

In the meantime end-to-end network solutions enable the implementation of a proactive Network Infrastructure process for long term, sustainable equipment performance and reliability. Meanwhile network solutions and reliability consulting services instill a proactive process for fast and reliable network.

THIRD EYE end-to-end Security Access Control Systems (SACS) provide one of the top best security solutions in the GCC. Therefore SACS enables companies to manage and secure their work environments with minimal costs and high end solutions.

Striving to be the best is achieved by working with the best. **THIRD EYE** pools talent and expertise with numerous, leading **implementation and technology partners** dedicated to delivering the best practices and best-of-breed solutions. Together with its partners, We deliver benefits directly to customers' bottom line.

MISSION

We combine technology and design to produce viable solutions for any organization and teach them to grow their business by leveraging the power of online and offline resources. We help our client's increase their business assets as well as we deliver high impact marketing tools and become the bridge in the gap between them and their clients. We help our customers not to lose track in the flood of information. We implement forward-looking systems by linking content and business processes and implementing appropriate interfaces to other Technologies. This makes our customers more competitive than even before.

VISION

Third Eye Security and Control Equipment LLC vision is to become the leading security provider in the power transmission industry. Tailoring our service to the customer's individual requirements. We will earn our customers' enthusiasm through continuous improvement driven by the integrity, teamwork, and innovation of our staff.

CCTV Solution

CCTV or Closed Circuit Television refers to a visible or covert video system intended for only a limited number of viewers. In Closed Circuit TV (CCTV), the picture is viewed or recorded, but not broadcast. It was initially developed as a means of security for banks and casinos; however, today it has been developed to the point where it is simple and inexpensive enough to be used with Home Security Systems, and for everyday surveillance.

CCTV ANNUAL MAINTENANCE CONTRACT AMC

THIRD EYE provides professional Preventive and Responsive Maintenance in the UAE. Our yearly CCTV Maintenance service includes checking the equipment and carry out necessary updates or repairs. Maintenance service agreements depend on the CCTV Equipment, size and setup. A free CCTV Site Survey can help us provide this figure to you.

VCCTV MAINTENANCE BENEFITS:

- ⌚ Maintenance reduces system failures
- ⌚ CCTV equipment last longer if regularly maintained
- ⌚ Minor faults will be identified before it is too late
- ⌚ Next day callouts & maintenance visit guaranteed
- ⌚ 7 Days a week technical support over the phone
- ⌚ Up to 20 free callouts per year on selected packages

MAINTENANCE PACKAGES INCLUDE:

- ⌚ Up to 40% OFF normal CCTV repair charges.
- ⌚ A visual inspection of all major and minor CCTV equipment.
- ⌚ Cleaning of security Camera lenses and housing.
- ⌚ Re-Focus camera lenses – This ensures a clear view and coverage angle.
- ⌚ Repair of faults which have occurred.

TIME ATTENDANCE

Manual attendance marking and calculation leads to consumption of time and cost of the organizations. Human errors, buddy punching and fraudulent time keeping are additional hidden expense which directly affects the productivity of any organizations. Variation in attendance policies from one company to another makes it challenging to capture time-attendance data and automate them. Therefore, a fully automated time management system is essential for enhancing productivity of any organization. We provide you with the following products for time and attendance.

Note: THIRD EYE also provides you customized software with the time attendance.

INTERCOM SYSTEM

Video Intercoms can increase your overall safety at home or at your business by allowing you to see who is at the door before you decide to open it or not open it. Home Security Store has a variety of video intercoms from high end models to more economical ones which produce images in both color and black and white.

An audio intercom is a communication device that allows communication to an entrance point. Audio intercoms usually consist of a call point at the entry and a phone type handset inside the property. The intercom can normally be setup to open a gate or door directly from the handset.

CAR PARKING MANAGEMENT SYSTEM

Our modern parking management systems consist of, parking guidance, car parking control and garage payment system, valet parking solutions and parking systems in all various types which are all connected from manual to automatic pay stations and a car park management center

SMATV SYSTEM

As satellites are in demand we provide all round services for satellite services like, IF Systems, RF Systems, IF/RF System, IPTV System, CATV Service and Central Antenna and Receiver beside programming, installation and configurations

QUEUE SYSTEM

Reception management solutions allow managing flows and the purpose of visits from initial contract to the service given.

These intelligent management systems allow to increase productivity and sales and reduce operating costs by ensuring that customer is served by the staff that are the most qualified according to the request. Reception management solutions are above all a way of increasing customer satisfaction by reducing the perceived and actual waiting time, creating a pleasant environment and a fair reception.

DIGITAL SIGNAGE SYSTEM

Imagining the future for hospitality with THIRD EYE Digital Signage Solution. Interactive digital signage technology is on its way to going mainstream, being adapted into venues from a wide range of industries for streamlining processes, communicating with employees, guiding customers, and marketing. One of these industries that is really conducive to digital solutions is the hospitality industry, including hotels, resorts, restaurants, pharmacies and malls.

COMPANY PROFILE

BUILDING MANAGEMENT SYSTEM (BMS)

A Building Management System (BMS) is a computer-based control system installed in buildings that controls and monitors the building's mechanical and electrical equipment such as ventilation, lighting, power systems, fire systems, and security systems. A BMS consists of software and hardware; the software program, usually configured in a hierarchical manner, can be proprietary, using such protocols as C-bus, Profibus, and so on. Vendors are also producing BMSs that integrate using Internet Protocols and open standards such as DeviceNet, SOAP, XML, BACnet, LonWorks and Modbus.

DIMING SYSTEMS / LIGHTING CONTROL

Lighting control systems are used for aesthetic and security illumination for interior, exterior, and landscape lighting. Also adds one or more portable or mounted keypad or touch screen console interface and can include smart phone or tablet operation. These control interfaces grant the user ability to remotely toggle (on-off) power to individual or groups of lights.

BACKGROUND MUSIC / DISTRIBUTED AUDIO

Add music to your home or garden. background music is a great way to set the ambiance in your home. Creates a more enjoyable living space. Background music can be seamlessly integrated into your home decor to provide your favorite music throughout your entire house, garden and outdoor living space. depending on the complexity of the system, each room cab play the same source at all times.

HOME AUTOMATION SYSTEM

We specialize in centralized control of lighting, security, HVAC, home appliances, and other systems, to provide improved convenience, comfort, energy efficiency and security of your home. State-of-Art home automation systems allows you to control your home from your iPhone, iPod Touch or iPad, PC, MAC from anywhere in the world.

HOME THEATER

The Technology-driven visual effects and acoustics and additional elements such as sound proofing, drape and lighting controls, special acoustic [Audio], custom seating, special carpeting and other advanced technology components providing endless possibilities when it comes to creating an "at home cinema experience".

AUDIO VISUAL SYSTEM

Installation and configuration of Audio Visual System is our expertise. Third Eye Security and Control Equipment LLC is Designing, Installing and Servicing Public Address, Music & Sound System, Digital Signage, Projectors, LCDs, Plasma Screens, Smart Home System, Home Automation, Digital Public Address (IP Solution), Video Presentation, Broadcast, Distance Learning and Video Conferencing Systems.

COMPANY PROFILE

ACCESS CONTROL SYSTEM

Physical access control is a matter of whom, where and when. An access control system determines who is allowed to enter or exit, where they are allowed to exit or enter, and when they are allowed to enter. Historically this was partially accomplished through keys and locks. When a door is locked only someone with a key can enter through the door depending on how the lock is configured. Mechanical locks and keys do not allow restriction of the key holder to specific times or dates. Mechanical locks and keys do not provide records of the key used on any specific door and the keys can be easily copied or transferred to an unauthorized person.

FIRE ALARM SYSTEM

An automatic fire alarm system is designed to detect the unwanted presence of fire by monitoring environmental changes associated with combustion. In general, a fire alarm system is classified as either automatically actuated, manually actuated, or both. Automatic fire alarm systems are intended to notify the building occupants to evacuate in the event of a fire or other emergency, report the event to an off-premises location in order to summon emergency services, and to prepare the structure and associated systems to control the spread of fire and smoke.

GATE BARRIER

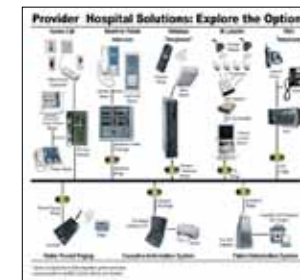

Barrier gates are the ideal solution if you need to control vehicle transit in public parking areas, car parks, private and block of flats entrances, even when the traffic is heavy.

The choice of the model of automatic barrier gates depends on the width of the entrance and the type of use.

PABX SYSTEM

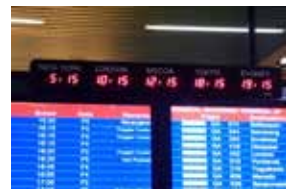

A business telephone system is any of a range of a multiline telephone systems typically used in business environments, encompassing systems ranging from small key systems to large scale private branch. A business telephone system differs from simply using a telephone with multiple lines in that the lines used are accessible from multiple telephones or "stations in the system, and that such a system often provides additional features related to call handling.

NURSE CALL SYSTEM

A nurse call button is a button found around a hospital bed that allows patients in health care settings to alert a nurse or other health care staff member remotely of their need for help. When the button is pressed, a signal alerts staff at the nurse's station, and usually, a nurse or nurse assistant responds to such a call. Some systems also allow the patient to speak directly to the staffer; others simply beep or buzz at the station, requiring a staffer to actually visit the patient's room to determine the patient's needs.

COMPANY PROFILE

MASTER CLOCK SYSTEM

Master clock systems consists of one accurate clock, usually in a secure room, and a number of slave dials which are driven by the master clock, thereby keeping all dials showing the same time. Such clock systems were developed in the early years of the 20th century and usually consisted of a one-second pendulum master clock that would produce electrical pulses either every second or every 30 or 60 seconds. Most systems installed in factories or schools only required accuracy to the minute or half minute, but broadcasting and telecommunications organizations required accuracy to the second.

ID CARD SOLUTION

We are in the business of providing proven, portable, reliable and robust ID Card Solutions to various customer segments ranging from a Corporate ID to a National ID card. We provide the following solutions to the id card.

FIBER OPTIC CABLING:

You hear about fiber-optic cables whenever people talk about the telephone system, the cable TV system or the Internet. Fiber-optic lines are strands of optically pure glass as thin as a human hair that carry digital information over long distances. They are also used in medical imaging and mechanical engineering inspection.

STRUCTURING CABLING SYSTEM (SCS)

THIRD EYE provides an internationally standardized structured cabling system and consolidating cable-delivery methods for all the systems can reduce initial construction costs for the cabling infrastructure of a modern intelligent building by up to 30 percent.

STRUCTURING CABLING TACTIC

Structured Cabling Services offers a portfolio of precision solutions to address your communication cabling and Data Center demands. THIRD EYE has delivered design, planning, implementation, product procurement, and maintenance services that ensure quality, consistency and on-time, on-budget delivery. Our flexible approach and through work practices guarantee successful result.

WIRELESS SOLUTION

Networks WLAN Solutions help you achieve the cost and productivity benefits. Our compliant offerings WLANs with the intelligence to identify devices and users as they connect; flawlessly adjust the level, confidentiality, quality and type of services being delivered; track and locate roaming connections and portable equipment; and monitor for and safeguard against unauthorized machines, activity, sessions and users.

COMPANY PROFILE

PUBLIC ADDRESS SYSTEM

All PA systems have a potential for audio feedback, which occurs when sound from the speakers returns to the microphone and is then re-amplified and sent through the speakers again. Sound engineers take several steps to maximize gain before feedback.

PA systems are often used in small venues such as school auditoriums, Mosques, and small bars. PA systems with many speakers are widely used to make announcements in public, institutional and commercial buildings and locations.

IT SERVICE

Third Eye has extensive Information Technology experience. Whether you are thinking about a launching simple website for your new business, looking for a provider to maintain your existing website, need a fast and reliable keypunch operator or just wondering how to search and build an outlook compatible large mailing list from search engines and online yellow pages, you are being assured that our experts are just an email away.

HELP DESK

Third Eye help desk is an information and assistance resource that troubleshoots problems and is available 24/7. The level-1 help desk is prepared to answer the most commonly asked questions, or provide resolutions. If the issue isn't resolved at the level-One, the ticket will be sent to level-2 support that has the necessary resources to handle more difficult issues. Also note that ISL has a third level line of support which often deals with software specific needs, such as updates and bug-fixes that affect the client directly.

CUSTOMIZED SOFTWARE DEVELOPMENT

Third Eye offer full cycle custom software programming services, from product idea, offshore software development to outsourcing support and enhancement. Third Eye employs a large pool of software engineers coming from different backgrounds. We are able to balance product development efforts and project duration according to your business needs.

E-LEARNING

E-learning (electronic learning) is the delivery of learning content and materials to learners in digital form via a variety of technologies.

E-learning is now an integral method for delivering knowledge to pupils and students in schools and colleges. The advantages of delivering exciting, interactive content to engage learners in an immersive learning process both in and out of the classroom are widely recognized and supported by educational professionals around the globe.

Online e-learning is the most effective way of delivering training to a dispersed workforce at a fraction of the cost of conventional training methods. Embrace Learning provide complete e-learning solutions to meet all your training needs including e-learning training courses and a powerful Learner Management System (LMS).

COMPANY PROFILE

E-BUSINESS / E-COMMERCE SOFTWARE DEVELOPMENT SOLUTION

Our Ecommerce applications are designed to enhance the business of the clients and enable them to do online business with ease. Our Ecommerce/E business solutions provide a great shopping experience for the end users. We undertake simple to multi-categorized inventory transactions.

We undertake

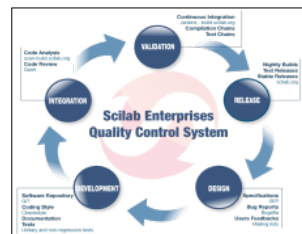

ENTERPRISE APPLICATION INTEGRATION (EAI)

Enterprise application integration (EAI) is the process of linking applications within a single organization together in order to simplify and automate business processes to the greatest extent possible, while at the same time avoiding having to make sweeping changes to the existing applications or data structures. Third Eye uses EAI for multiple functions such as Data Integration, Process Integration, Vendor independence and Common Fade.

ENTERPRISE QUALITY ASSURANCE (QA)

Third Eye enables its customers to deliver reliable and quality software by providing end-to-end testing, faster time-to-market, increased productivity through automation, and robust processes. We provide testing services to cater to various segments in the Technology and Enterprise segment. ISL compliments customer teams to enhance their testing tasks. Our proven methodologies enable us to perform assessments, create and conduct tests that are carefully designed, comprehensive and precisely focused on each business case.

CONSULTING SERVICE

The technology management consulting team at Third Eye improves the alignment of business and technology through improved process efficiency, reduced cost and enhanced business value of IT. Our consultants combine extensive technical experience with strong strategic and business focused leadership.

ACTIVE COMPONENT SYSTEM

A component that is not passive is called an active component. An electronic circuit consisting entirely of passive components is called a passive circuit (and has the same properties as a passive component). Used without a qualifier, the term passive is ambiguous. Typically, analog designers use this term to refer to incrementally passive components and systems, while control systems engineers will use this to refer to thermodynamically passive ones.

THIRD EYE MANAGEMENT TACTICS INCLUDES

THIRD EYE has offered exclusive network infrastructure solutions to all size-businesses in the GCC, for companies to deliver the best performance to citizens and end-users.

- ▣ **Risk Management** - the classification and analysis of threats to the success of the project and development of counter-measures.
- ▣ **Quality** - assigned to each individual product at all levels of planning.
- ▣ **Control** - pre-defined management and resolution points at all stages of preparation and authority.
- ▣ **Organization** - identification of responsibilities and workforce who have the authority, designation and expertise to ensure the victory of the project.

WORK FLOW

THIRD EYE Engineers are Cisco certified designers, that work with the client to establish the most fitted cabling solution. By taking into consideration strict cabling strategy, the most up-to-date manufactured goods and the client's prospect business drivers, the system designer will combine all critical aspects to deliver a state-of-art infrastructure.

A dedicated technical team of cabling engineers, under the guidance of a designated THIRD EYE PM, will perform the installation. The PM acts as a single point of contact between the client and ensuring that the project is delivered on time and within budget.

PM will guarantee that the achievement of a new infrastructure does not cause disturbance to the core business and that the mission is delivered within the timescales necessary and with the minimum of risk.

THIRD EYE Certified by Dubai Police and Department of Protective Systems Dubai, UAE

THIRD EYE team of PMs are skilled to deliver technical and logistical projects on time, within budget and to requirement.

- ❖ **EXECUTIVE MANAGER** 10 years experience.
- ❖ **GENERAL MANAGER** 10 Years experience building Security Companies.
- ❖ **PROJECT MANGER** 7 years of experience in handling numerous IT Objectives.
- ❖ **SALES MANAGER** 12 years experience.
- ❖ **SALES EXECUTIVE (5 Persons)** 5-9 years experience.
- ❖ **IT ENGINEER** 9 years experience
- ❖ **SERVICE TECHNICIAN Quality Officer** Over 5 years experience
- ❖ **SERVICE SUPERVISOR** 4 years experience in Project Management & Service support
- ❖ **INSTALLATION TECHNICIAN** (5 Person) Certified by Dubai Police and Department of Protective Systems Dubai, UAE
